What is a 12V solar panel?

A 12V solar panel is used with a 12V charge controller, a 12V battery bank, and a 12V inverter. While 20V and 24V panels are more common, manufacturers like Rich Solar still offer 12V solar panels.

What does 12V/24V mean on a solar panel?

The 12V/24V in product titles (ex. 100W 12V Monocrystalline Solar panel) does not refer to the actual voltage (Voc or Vmp) of the solar panels, but rather to the voltage of the solar system or energy storage system to which the panel is best suited. Why is it different from the value on the label/specification sheet of the solar panel?

Which PV solar panels are available?

Our rigid pv solar panels are available in 12V and 24V, and in polycrystalline, monocrystalline technologies. We supply solar panels from all the main manufacturers such as Sharp, Kyocera, LG and Yingli, and we are proud to be distributors for ICP and InproSolar.
