A portable 12v power supply is used for camping, emergency backup, outdoor events, or any situation where access to a standard power outlet is unavailable. A portable 12v power supply typically consists of a rechargeable battery, an inverter, a charger, and various connectors and cables.

No external battery required, built-in lithium-ion battery inside ATX power supply. More space can be saved compared to commonly found UPS because of the built-in battery package in the housing. It is also possible to implement UPS ...

The rated power consumption is often measured at 1/3 or 1/8 average power output. Two 150W channels at full blast will need about 600VA but music has much lower. 245W power consumption sounds reasonable for the active power consumption at 1/3 power output or possibly it could be 245VA apparent power at 1/8 power output.

The HyperJuice 245W GaN USB-C Power Adapter is a high output power adapter with 4 USB-C Power Delivery ports up to 100W maximum output. High-power and compact charger made by cutting-edge GaN technology can power 4 "MacBook Pro/Air and other medium sized laptops simultaneously.
