Uninterrupted Power Supply System 24kWh. This Zero Transfer Uninterrupted Power Supply (UPS) system is suitable for both mains-powered and off-grid applications where a stable and reliable source of AC. power is required. Suitable for large households, servers, datacentres, telecommunications or other commercial and industrial use.

$[\text{UPS heat rejection in watts}] * [3.41 \text{ BTU/hr/watt}] = \text{UPS heat rejection in BTU/hr}$ This isn't perfect because it doesn't take battery charging into account, but I usually think that is OK. Most chargers do not consume much power, and many chargers today will lower their power draw if not turn entirely off when the batteries are fully charged.

This Photonic Universe Uninterrupted Power Supply (UPS) system is suitable for both mains-powered and off-grid applications where a stable and reliable source of AC power is required. Ideal for running household appliances, IT and ...
