Where the panels are on a camper van or boat, partial shading of a solar panel is typical. In these circumstances heat build-up and damaging hot spots can occur leading to a significantly reduced life cycle of the panel. The larger 60w to 180W panels have up to two shading diodes housed within the fully waterproof junction box to prevent this.

This 40W Mono/Polycrystalline Solar Panel has an estimated lifespan of more than 30 years (when correctly maintained).
