How much power does a 12 volt inverter need?

At 2500 Watts, the 12 Volt inverter would need over 200 Amps from the 12 volt converter. At 2500 Watts, the 12 Volt inverter would need over 200 Amps from the 12 volt converter. That would need some very fat cable. When you're dead, you don't know it, the pain is only felt by others. The same thing happens when you're stupid.

What is a DC inverter?

An inverter is an electrical device that converts DC power to AC power. DC ("direct current") power sends a constant flow of voltage in one direction, while AC ("alternating current") power changes direction periodically and alternates between negative and positive voltage.

How to choose a power inverter?

Adopt good conductive material, and the conversion rate is over 90%. The power inverter's output is more stable, and the impact of the ability is excellent, up to the effect of frequency machines. A beeping reminder device is installed to ensure the safety of the power inverter.
