"Golden size" design enables nearly 99% container space utilization rate With golden sized dimensions of 2382mm by 1134mm, the medium-format N-type series modules allow for a 40HC container space use of nearly 99%, which currently boasts the highest container space utilization rate, significantly reducing logistics.

Based on the 210mm large-size silicon wafer and monocrystalline PERC cell, the Vertex comes with several innovative design features allowing high power output of more than 605W. Excellent temperature coefficient and low irradiation performance brings the greater power. Furthermore, benefit from square mono cells and high-density encapsulation ...

Jinko Solar's Tiger Neo 78HC-BDV is a bifacial photovoltaic panel with an ultra-high power output of up to 625W. With its advanced technology and superior performance, it is an excellent choice for large-scale solar power ...
