

72v inverter changed to 60V power supply

When does the inverter output voltage go into error 72?

At that point the inverter output voltage starts getting less stable (jumps between 238 and 220) until it goes into error 72. The time this usually happens for me is at the end of the day 16:45 when my PV generation starts to match my load (+/-400W) for about 10 - 15mins. During that time I have risk of getting error 72.

What is a 60V DC/DC converter?

A 60V DC/DC converter converts the input DC voltage to a 60V stabilised DC voltage. DWE supplies DC/DC converters with various input voltages over a wide range and different output voltages. All our 60V converters meet high quality standards and have a high efficiency.
