

Addis Ababa EK needs outdoor power supply

What is the power supply system in Ethiopia?

Ethiopia's main power supply system is made up of a publicly owned and operated interconnected system with a total 4,418 MW installed generation capacity and there are also small operational and active off-grid self-contained systems supplied by diesel generators and hybrid solar-diesel with a total installed capacity of 21.8 MW in 2021.

Are water and power outages common in Addis Ababa?

While connection to water and electricity supply networks has expanded significantly, water and power outages are common in Addis Ababa. In short, both the quantity and quality of services require significant improvements over the coming years.

Does Addis Ababa need a well-maintained water supply network?

Currently, around 50-55% of Addis Ababa's population has to buy water from shops at high cost or access unsafe water from unprotected wells and rivers. A well-maintained water supply network would render expensive or unsafe water an issue of the past.
