

Albania makes outdoor power

How much hydropower does Albania have?

The Albanian power system is dominated by hydropower, representing 95% of the country's installed capacity with a total of 2,493 MW. The installed hydropower capacity comprises mainly large hydropower installations (i.e., above 10 MW in size) amounting to 2,168 MW, while small hydropower installations amount to 325 MW.

Why does Albania need to import energy?

Changing weather patterns over the years have forced the country to import energy to cover domestic needs, as a lack of storage capacity requires Albania to sell its generated power during peak months of production.

What is the energy policy of Albania?

Energy Policy of Albania includes the promotion for the use of renewable energy sources beyond hydropower due to the significant potential our country has for photovoltaic and wind energy production, and its favorable geographical position, climate conditions and high intensity of the solar radiation for the use of solar energy.

What is the main source of electricity in Albania?

Hydropower accounts for the largest share of the country's electricity generation, representing around 95% of Albania's installed power capacity. As a result, the country is highly dependent on annual rainfall for electricity generation, leading to notable fluctuations in domestic energy production.

How can Albania achieve a smart energy infrastructure?

Creation of a smart energy infrastructure: Supporting solar and wind energy source projects to diversify the renewable energy portfolio, harnessing Albania's ample sunlight and wind resources for clean power generation.

Is the energy sector a sustainable source of growth in Albania?

The National Energy Strategy 2018 - 2030 states that the energy sector has the potential of being a sustainable source of growth for the country over the short to medium and long-term. Albania has the potential for increasing the amount of electricity produced domestically and therefore decreasing necessary energy imports.

This dependence makes the energy sector vulnerable to variations in water availability and climate change. Intermittency and Grid Integration: ... The Albanian Power Corporation is the state-owned company responsible for electricity generation. KESH operates hydropower plants and contributes significantly to Albania's electricity production.
