A dual voltage rated appliance will display for example "INPUT: 110-240V" on the body of the appliance or its power supply. This means that you will not need a converter or transformer but just a travel adaptor, because Algeria operates on a 230V supply voltage, which is within the 110-240V range that the dual voltage appliance operates on.

If you're visiting Algeria you might need a power converter as voltage differs from country to country. ... It can be dangerous to use an appliance that is a different voltage from the power supply, so if unsure - don't plug it in. You should be extra careful with high voltage appliances, such as hair dryers for example. ...

Consider the Algeria power compatibility checklist to ensure you have the right adapters for your electronics when traveling to Algeria. When preparing for your trip, keep the following in mind: Voltage Compatibility: Algeria operates on a 230V supply, so make sure your devices can handle this voltage to avoid potential damage.

In November 2001, Sonelgaz signed a similar deal with Spain's power group Red Electrica de Espana to build an underwater power line between Algeria and Spain. Currently, Algeria has two links to the Moroccan electricity grid and supplies over 550 gigawatthours (GWh) of electricity to Morocco.
