

Amman Outdoor Power Agent

Is AES a reliable power plant in Jordan?

AES Jordan generates approximately 8% of Jordan's electricity and is one of the most reliable power plants in the country. AES' portfolio in Jordan also includes a 241 MW Tri Fuel power plant, which entered into commercial operation in July 2014.

Why is Amman a good arid country?

The fact that the plant uses virtually no water is also a big benefit for the arid country. The engines have closed circuit cooling systems with adequately sized radiators to accommodate the temperatures experienced in Amman, which are rarely above 97F. -- Aaron Larson is a POWER associate editor.

Where is the AES Levant Power Plant located?

The AES Levant power plant is located east of Amman, on the same site of the existing Amman East power plant. The project was built and is owned and operated by AES Levant. The project is a tri-fuel engine technology, designed primarily for peaking operation, allowing a high range of flexibility in terms of fuel usage and dispatch.

We provide services to a diverse portfolio comprising over 500 power and energy assets, boasting an installed capacity exceeding 1.5 GWp. Our operational reach extends across the Middle East, North Africa, and GCC ...
