

What are container structures used for?

Containers are used for many functions in various fields, and often preferred as light structure materials. Prefabricated materials such as sheets, steel profile are preferred instead of traditional construction materials such as brick and cement in the production of container structures, offering easy and flexible solutions for users.

What are classic container types based on light steel frame system?

Classical container types projected on light steel frame system are built on first class galvanized structure steel, completely non-welded joints and main columns ensuring superior durability. Thus, it is suitable for both single storey structures and double or three storey structures.

What is a flatpack container system?

Flatpack container systems are constituted of upper frame, bottom frame, load bearing beams and sandwich panels. Each piece is designed to complement each other, and packed accordingly.
