Drawbacks of Hybrid Solar lighting In a HSL system, light can only travel a short distance. Typically, hybrid solar lighting will be effective around a 50 feet area from where the light collector is installed. In this regard, a room on the ground floor of a multi-story building may not be perfectly illuminated by a hybrid solar lighting system.

We are the strongest local manufacturer in the Kingdom of Saudi Arabia with a remarkable reference in all entities of the Kingdom adding to be the first local manufacturer to produce LED Luminares.
