Why are supercapacitors called EDLCs?

When a voltage is applied, two separate charged layers are produced on the surface with a small separation distance. This is why supercapacitors are often referred to as electric double-layer capacitors or EDLCs. A lithium-ion capacitor (LIC or LiC) is a hybrid type of capacitor classified as a type of supercapacitor.

Are ionic super-capacitors better than other energy storage products?

Ionic's planar super-capacitors form the basis of our energy storage products. Our research suggests they are smaller, better, faster and have a range of other superior features to existing products: high resolution; small feature size; high throughput; complex geometries; and high conductivity.
