Optimise your power supply with accessories from the Weidmüller product range. For example, by creating a redundant power supply using our modules, you can protect your switch mode ...

If it says for example, 1,000mA, this is simply 1A. So a 12V / 1000mA power supply is simply 12VA. Once you have added all the "VA" together, you know the total power requirement for your system. This must be below the rated VA of the UPS, or it will not power the system - you will simply overload the power inverter in the UPS.

An Uninterruptible Power Supply (or UPS) does exactly that, protects your equipment if there is a power failure. In Australia we know how common blackouts and brownouts can be, especially during the We do all we can to protect our critical in the workplace, but have you thought about protecting your critical equipment?

Uninterruptible power supply (UPS) is indispensable in critical infrastructures.
