

Bahamas Jiwa Solar Panels

Who is Bahamas Solar?

At Bahamas Solar, we take care of your project from start to finish. We offer full turnkey systems for all residential and commercial operations, serving all The Bahamas. The first step to going solar is a site assessment.

Is solar a good option in the Bahamas?

On a kilowatt-hour (kWh) by kilowatt-hour basis, solar's your best, but you need to add battery energy storage capacity in order to reach higher levels of penetration," he noted. "Nassau's [the Bahamas' largest city] is a pretty big grid, and it can take a fair bit of solar without storage," Burgess continued.

Does Bahama have a solar power project?

The Bahamian government owns and manages property rooftops, parking lots and green spaces, on which solar power projects could be developed. Several projects that capitalize on that solar power potential are underway, Jones Bahamas points out.

How will the family Islands solar power system work?

Development of the four solar-fueled power systems will set the stage to scale the Family Islands solar program across the island chain's outlying islands, as well as contribute to the Bahamas achieving a national goal of renewable energy resources meeting 30% of electricity needs by 2030.

Who is Island Solar?

Island Solar is a company based in Nassau, Bahamas that specializes in installing solar electric (photovoltaic) systems. They focus on commercial systems ranging from 50 kW to multi-megawatt utility scale systems, ensuring safety, high quality, and code compliance.

What is the focus of Island Solar?

Island Solar is based in Nassau, Bahamas and is committed to installing safe, high quality, code compliant and long lasting solar electric (photovoltaic) systems in the Bahamas and across the Caribbean.

100% self-sufficient, carbon-neutral solar power and outdoor lighting solutions. We have solar roof tile and solar panel solutions. We have independent solar lighting solutions. All our products are fully independent, powered solely by nature, they are weather-proof, and based on the best technology available.

The islands that comprise the Bahamas have moderate potential for variable renewables--wind and solar--but limited or no potential for baseload renewables such as hydropower or geothermal. Interconnecting the Bahamas' 16 isolated island grids would be necessary to transport power generated from renewable energy across the country.
