

Benefits of camping with outdoor power supply

Are portable power stations good for camping?

On their own, portable power stations essentially act as a giant battery -- most provide at least enough electricity storage to power all your essentials for a weekend of camping. For longer camping trips, we recommend combining a portable power station with portable solar panels to give you access to clean, renewable solar power -- wherever you are.

Do you need a portable power station for off-grid camping?

Thanks to a portable power station, you can get all the benefits of off-grid camping while still having access to modern conveniences -- no more running out of phone battery or relying on potentially hazardous light sources like lanterns. With a portable power station, you can access electricity even in the most remote locations.

What can be powered with a camping power pack?

You can power your favourite camping accessories and electronics, such as a portable camping fridge, with a camping power pack. Whether you are camping, boating or caravanning, our range of power packs will ensure you can keep these essentials running for days.

Why should you buy a portable power station?

With a portable power station, you can enjoy modern life's amenities when you venture into the great outdoors. Imagine waking up to the sounds of nature while still being able to make a fresh cup of coffee without the hassle of a campfire or a propane camping stove.

Which power station is best for your RV?

A bigger portable power station, such as the Eco-Flow RIVER 2 Pro, provides more than enough power to run small appliances such as microwaves, electric kettles, blenders, and fans. Off-grid energy supply especially comes in handy for older RVs with few outlets and small generators with limited electrical capacity.

Are gas-powered generators bad for camping?

Gas-powered generators are noisy and release toxic emissions, including carbon monoxide. Not only does this impact your camping experience, but a loud generator can annoy neighboring campers. Many campsites require a permit to run a fossil-fuel-powered generator and only allow them to operate during limited hours.
