

What will Bulgaria's new solar power plant do?

With a nominal output of 124 megawatts peak (MWp), the Verila solar power plant will make a significant contribution to Bulgaria's green electricity mix from spring 2023 onwards. Built by SUNOTEC, the new solar park will generate energy equivalent to 12 percent of the current total output of all PV plants in the country.

What is the biggest solar PV plant to be built in Bulgaria?

This is also one of the biggest solar PV plants to be constructed in Bulgaria in recent years. With the solar PV plant, Aurubis Bulgaria will save some 11,700 MWh per year from grid electricity consumption (sufficient for approx. 12,000 households), which will cover an average of 2.5% of the electricity needs of its smelter facility.

How big is Bulgaria's solar power?

In a matter of months, Bulgaria's total solar power capacity is set to exceed 3 GW, compared to just 1.3 GW at the end of 2021. The lineup in the list of the largest photovoltaic plants is changing almost every week as major facilities come online, and there is more in the pipeline.

Will solar power increase in Bulgaria in 2023?

Solar Output in Bulgaria Set to Increase by 12% With a nominal output of 124 megawatts peak (MWp), the Verila solar power plant will make a significant contribution to Bulgaria's green electricity mix from spring 2023 onwards.

Why are distributed solar PV projects being built in Bulgaria?

Most distributed solar PV projects currently being built in Bulgaria are being configured purely for self-consumption; in other words, they are not connected to the grid, and are being used strictly to reduce the customer's electricity bill. This makes it harder for distribution system operators (DSOs) to monitor, and control.

Does Bulgaria benefit from solar power subsidies?

In the last two years, the combined nameplate size of solar power installations in Bulgaria has doubled to more than 2.4 GW and additions peaked this summer. Moreover, in the current top 20, no photovoltaic units built since 2021 benefit from any subsidies, data compiled by Capital.bg showed.

Rezolv Energy will develop the largest solar power plant in Bulgaria, right on the border with Romania. The 165-hectare, 229 MW plant will be located in the town of Silistra in ...
