

Buying Guide Outdoor Power Supply

How do I choose a power station?

Look for a power station that can handle the combined wattage of the electronics you plan to plug into it. If you want to power a toaster that uses 400 watts simultaneously with a blender that uses 600 watts, then you'll need a power station that has a maximum output of at least 1,000 watts.

Can a power station be used as an ups?

Most large power stations, including the EcoFlow Delta 3 Plus and Anker F3800 Plus, can serve as an UPS (uninterruptible power supply) for your home. To use these power stations as a UPS, plug them into the wall, then plug whatever devices you want backed up into the station's AC output ports.

Which battery is best for a portable power station?

These days most portable power stations, including all those we recommend here, use LiFePO4 batteries, which are capable of holding far more cycles, which is the number of times a battery goes through a complete discharge and recharge, than older lithium-ion batteries while also being less likely to combust.

What is the best portable power station?

With a great power-to-weight ratio, the latest version of the Bluetti Elite 200 V2 is a great portable power station for powering a camper or providing backup power for the essentials. With its tremendous capacity, the EcoFlow Delta Pro 3 is truly capable of providing a whole-home backup without gas or solar panels.

Are portable power stations worth it?

This power station offers a lot of bang for the buck. Sure, it isn't going to power your house through a days-long outage, but it offers a lot of nice features for the price, making it one of the better values out there, especially if you can pick it up on sale. How long do portable power stations last?

Does a power station have ingress protection?

Some power stations have ingress protection (IP) ratings, indicating they have been tested for water and dust resistance. The Bluetti Elite 200, for example, has an IP65 rating, which means it can withstand water sprays from all angles.

An uninterruptible power supply (UPS), offers guaranteed power protection for connected electronics. When power is interrupted, or fluctuates outside safe levels, a UPS will instantly provide clean battery backup power and surge protection for plugged-in, sensitive equipment.

When to use a portable power station. Outdoor activities: hiking, camping or anywhere where access to power is limited. Emergency situations: blackouts and brownouts can be common in certain areas where power supply is unstable, whether that's through natural disasters or unstable networks. Recreational events: picnics and events such as conventions ...
