

Can the outdoor power supply on the Internet be trusted

Which outdoor use devices are compatible with power over Ethernet (PoE)?

Outdoor use devices that are compatible with Power over Ethernet technology (PoE range) include surveillance cameras, WiFi routers, and other wireless hardware. Outdoor-mounted PoE equipment increases the risk of damage from high-voltage surge events. This equipment acts as a lightning rod.

Do you need a surge protector for outdoor PoE equipment?

Surge protection is an important preventative measure to avoid extensive damage. For outdoor PoE equipment, it's important to protect the device and the supporting equipment like switches and routers. It's best practice to install two inline surge protectors for each device. The first surge protector is installed near your switch or router.

What is power over Ethernet (PoE)?

PoE (Power over Ethernet) has become a popular medium to deliver power and transmit data for outdoor equipment. Outdoor use devices that are compatible with Power over Ethernet technology (PoE range) include surveillance cameras, WiFi routers, and other wireless hardware.

How do I install an indoor PoE surge protector?

Run an ethernet jumper from the switch or router to the indoor PoE surge protector. (The indoor PoE surge protector guards indoor equipment and personnel from surge.) - Plug the main ethernet span into the indoor PoE surge protector. Run the ethernet cable to where the outdoor PoE surge protector will be mounted.

Is PVC cable suitable for outdoor use?

Standard twin and earth PVC cables aren't suitable for permanent use outdoors. The sheath of this cable (grey or white) has limited resistance to UV radiation, but isn't specifically designed for installation in direct sunlight or outdoors.
