The three-phase grid tie inverter price is reasonable, with 25kW power capacity, two MPPT, and pure sine wave output. The on-grid tie inverter adopts a wide DC input range of 200-820V and a wide AC output range of 208-480V to adapt to the needs of different occasions. The noise of a 240V grid tie inverter is no more than 50 dB.

An on-grid inverter's main job is to convert DC power generated from the PV array into usable AC power. Hybrid inverters go a step further and work with batteries to store excess power as well. In the developing world, hybrid inverters are more of a necessity to compensate for weak or intermittent grids or a lack of grid electricity all together.
