Protect sensitive electronics and equipment during power surges and blackouts with a UPS System or Uninterruptible Power Supply from our extensive UPS lineup of standby, line-interactive, and double-conversion models. Battery ...

The Standby UPS. A standby UPS runs the computer off of the normal utility power until it detects a problem. At that point, it very quickly (in 5 milliseconds or less) turns on a power inverter and runs the computer off of the UPS's battery (see How Batteries Work for more information).. This type boasts features like basic surge protection and battery backup ...

An Uninterruptible Power Supply (UPS) is an electrical device used to provide emergency electrical power to different electrical loads in the case of a main power supply failure. A UPS or uninterruptible power supply uses batteries and supercapacitors to store electrical energy and delivers this stored electrical energy when the
