

Does Mexico need outdoor power

How will Mexico change its energy landscape?

After a Constitutional reform on October 2024, President Claudia Sheinbaum has sent to the Mexican Congress a set of laws, which aim to transform the country's energy landscape by returning control to the state, although redefining private participation. The reform is influenced by both national and global factors.

Does Mexico have a strong energy sector?

Mexico has an expanding energy sector, prepared to meet the demand of its growing population. Historically reliant on fossil fuels and a leading oil producer, Mexico's electricity generation is based on imported natural gas, from which this Latin American country has one of the largest power generating capacities worldwide.

What percentage of Mexico's electricity comes from fossil fuels?

Although almost three-quarters of the electricity produced in Mexico was from fossil fuels in 2022, the country's General Climate Change Law set the goal of having at least 35 percent of green energy in its power mix by 2024. Discover all statistics and data on Electricity in Mexico now on [statista.com](https://www.statista.com)!

What opportunities are there in Mexico's electrical power industry?

Mexico's electrical power industry mainly offers opportunities for U.S. products, services, and technologies for energy efficiency, distributed generation, energy storage, small-scale renewable energy projects, and distribution networks. The U.S. Commercial Service Mexico is ready to assist you in exploring these opportunities in Mexico.

What percentage of electricity is renewable in Mexico?

Mexico aims for 33% renewable electricity by 2030, which is below the global share of 60% renewable electricity set out in the IEA Net Zero Emissions scenario. Explore the latest data on Mexico's energy transition. How clean is Mexico's electricity?

Are US and Mexico's energy sectors interconnected?

The U.S.' and Mexico's energy sectors are deeply interconnected, with significant cross-border electricity trade, extensive natural gas imports by Mexico, shared supply chains, and U.S. investments in Mexico's energy market. The contradictory stipulations in the LESE could lead to:
