

External electric push bar with outdoor power supply

What is fire door push bar Exit Hardware?

Fire door push bar exit hardware is essential for maintaining safety in commercial and public buildings. Designed to facilitate swift and secure exit during emergencies, these products combine durability with compliance, meeting BS EN 1125 standards.

What is a fire escape door push bar?

Sometimes referred to as crash bars, these single action egress devices provide a safe exit for single and double doors in high occupancy or public spaces. Whether touch bars or push bars, the right panic hardware ensures users of your facility remain safe in a panic situation. Why Choose Fire Escape Door Push Bar Hardware?

Do you need emergency exit door push bars?

If in any doubt, in the event of an emergency opt for emergency exit door push bars over push pads. Commercial Buildings: Offices, retail spaces, and warehouses where quick evacuation routes are essential. Public Spaces: Schools, hospitals, and leisure centers require reliable emergency exit systems.

What is an actuator push bar?

The actuator push bar allows touch/push bar operation across the door width to activate an electronic locking device, ideal for use with face to face fixed electro-magnets. Order the Deedlock panic push bar online at Electric Locking Systems with worldwide delivery, same day dispatch and free technical support.

How does a push bar work?

Push bar hardware simplifies evacuation and egress by enabling rapid door opening with minimal effort. This is crucial in emergencies - time is critical. The horizontal bar mechanism is intuitive, ensuring untrained individuals can operate it effectively. No prior knowledge should be required to operate emergency exit push bars.

What locking options are available on emergency push bar exit doors?

Opt for systems with outside access devices for external locking options on emergency push bar exit doors. Options include: Knob operated- Models like the Exidor 302 have concealed fixings and a freely rotating knob when disengaged. Knob operated OADs are non-handed. Cylinder locking - built-in, replaceable, keyed alike, or master keyed.
