Does Fiji have a good energy supply?

Like for many other SIDs Fiji's geographical situation means that affordable and accessible energy supply is a challenge. The Island state depends heavily on imported fossil fuel to meet its energy needs, nevertheless, renewable energy sources, mainly hydro, account for 55% of the country's total energy production.

What type of electricity is used in Fiji?

Renewable electricity here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal power. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Fiji: How much of the country's electricity comes from nuclear power?

How can Fiji improve energy security?

Currently hydro power accounts for a large proportion of Fiji's renewable energy generating. However, scaling up other renewable energy technologies, such as solar, would diversify state's energy mix and thereby help improve energy security.

Does Fiji have a power outlet?
