

Generators in containers

What is a containerised generator?

With sound proofing by means of the acoustic lined container that is both lockable and weather proof - these are usually installed outside a building in a car park or outside the intake room. Containerised generators are usually larger generators above 500kVA and upward, and are 80dbA @1 metres noise level. We can make these even more silent.

What can containerising generators do for You?

These bespoke solutions include noise reduction systems for traditional generators, accommodating twin sets within a single container, and rental-ready designs. Containerising generators allows us to deliver a broader range of innovative and flexible power solutions. Enhanced Durability: Optional C4 paint finish for tough environments.

What are containerized generator / packaged container and enclosure options?

Containerized generator / Packaged container and enclosure options provide alternatives to installations in existing or new buildings. We have significant experience with pre-packaged container and enclosure solutions for engine-generator sets, balance of plant equipment, and switchgear.

What are the safety features of a generator container?

Safety Features: Equipped with fire safety alarms and intruder alarms for enhanced security. All wiring is designed to meet BS 7671 standards, ensuring compliance and reliability. These containers house generators ranging from 800kVA to 3000kVA, available in 20ft, 40ft, and 45ft sizes, tailored to fit your specific needs.

Why should you choose genset containers?

With our genset containers offer optimal performance in various site conditions. By maintaining high-quality standards for both the engine and the complete containerized power plant package, we ensure excellent reliability for your power and heat generation needs. Easy to install and disassemble, convenient for maintenance and inspection.

How many kVA can a container house a generator?

These containers house generators ranging from 800kVA to 3000kVA, available in 20ft, 40ft, and 45ft sizes, tailored to fit your specific needs. Contact us today to discuss your requirements. In addition to our standard range, we offer custom-manufactured containers tailored to your specific needs.

Containerized generator / Packaged container and enclosure options provide alternatives to installations in existing or new buildings. We have significant experience with pre-packaged container and enclosure solutions for engine ...

ISO container generators are ruggedly built versatile devices designed for various uses. They adhere strictly to

Generators in containers

international shipping norms hence easily transportable. Available in different sizes offering scalable solutions. Designed ...

Container Design: Built to international container standards, generator sets up to 1000KVA use 20-foot containers, while larger sets (over 1250KVA) are housed in 40-foot containers. Transportation Efficiency : CSC-certified to meet the International Convention for Safe Containers, allowing direct shipment as standard containers and reducing ...
