Concurrent with that, Western integrators like Powin, Fluence and Wärtsilä have launched their own products of that form factor, a departure from their previous proprietary modular approach. Several BESS developers and operators Energy-Storage.news has spoken to recently said the 20-foot 5MWh form factor was the only viable product for their projects.

The jerrycans became popular improvised storage containers used by lower income households to fetch and store water in the face of water shortages that hit the country in the years preceding the privatisation of the utility. The water containers were named after the president of Ghana at the time, John Kufour (2001-2008).

Offshore support vessels, for instance, would particularly benefit from a self-contained solution, as the electrical room space on board is especially limited. Flexible and cost-effective energy storage system technology would also be relevant to container ships, ferries, drill ships and other vessel types.
