In Ghana, a key component of the project is supporting small scale farmers to access and use solar PV pumps for irrigation purposes through market incentives and capacity development for solar companies and farmers. The market development approach was used to link suppliers of PV pumps to the farmers.

The group established similar gardens in several other villages, including Vugundaa and Mettoh Yipaal, all within the northern, north east, upper east and upper west regions of Ghana. They also built fences, established community savings schemes, and procured solar water pumps for irrigation during the dry-season.

Small-scale irrigation (SSI) technologies can be useful not only to increase crop productivity and income but also as a viable adaptation practice to climate variability. A farm simulation model (FARMSIM) and data from selected SSI technologies piloted in northern Ghana under the "Feed the Future-Innovation Lab for Small Scale Irrigation" (ILSSI) project were used ...

The 5MW Floating Solar plant is also part of the successful implementation of the Bui Hydro-Solar Hybrid (HSH) system, a significant milestone for Ghana within the West African sub-region. This innovative system in addition to the already existing 50MWp land based solar farm is the largest farm so far in Ghana.

They already have a wealth of experience in the sector from years of selling water pumps for irrigation, and with the Futurepump SF1 they embrace the fantastic opportunity for solar irrigation in Ghana. Headquartered in Tamale, Northern Ghana, Hatoum Trading Company has boldly taken on the challenge to supply the solar pump in the whole of Ghana.

Ghana promotes solar water pumps

The Ghana Solar Water Pumping Project, initiated by World Vision and Always On Solar(TM), addresses the critical need for reliable water supply in rural communities of northern Ghana.

Overcoming Challenges and Benefits with Solar Technology. Electricity Independence: Free from electricity and diesel dependency, our pumps are ideal for remote locations, providing consistent water supply without interruption. Durability: Frequent voltage fluctuations can damage traditional motors, but Shakti Solar Pumps deliver stable energy, reducing the risk of motor burnout.

By: Sadah Adil, Programs Manager, Cleanenergy4Africa During the past decades solar energy became an integral part for many sorts of technologies, across the globe. Combined Heat and Power (CHP) and solar thermal systems are good examples of such emerging "partnerships" so to speak, serving consumers in either solar-only or solar hybrid ...
