Guatemala's new outdoor power supply

In Guatemala, power plugs and sockets (outlets) of type A and type B are used. The standard voltage is 120 V at a frequency of 60 Hz. Yes, you need a power plug travel adapter for sockets type A in Guatemala.

Energy supply. Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country. Some of these energy sources are used directly while most are transformed into fuels or electricity for final consumption.

Solel Boneh Guatemala, Sociedad Anonima, a construction company based in Guatemala City, awarded GE a contract of nearly US\$10M to supply equipment and services for the 44MW hydro plant. GE installed and commissioned all the equipment in only five months, including a 15-day trial run, ensuring that the project was completed on schedule.
