

Household Solar Light Recommendation

How much sunlight does a solar panel need?

Generally, eight-10 hours of direct sunlight per day, will produce around 15 hours of illumination. But this will depend on location, type of light and exposure it gets. It's best to place your lights in an area that isn't shaded by trees, walls or even certain roofs, as these can obstruct the amount of light the solar panels receive.

Why should you choose solar light for home?

The solar panel collects the solar energy all day long and stores it in gel-cell solar batteries that are rechargeable. This way, you get solar light for home all throughout the day and night. You can get numerous reasons for choosing these lights over our traditional lights. Some key benefits of solar light for home and other facilities are:
