How many hours a day do you Use Your Box?

Let's say that you use your box for 5 hours every day. For the rest of the time, it will be on active or passive standby. Obviously, passive standby will cost you next to nothing. However, you have no control over that and Sky Eco mode is only between 2.30am and 5:45am. That's 3 hours and 15 minutes each day.

How long does a portable power station take to charge?

On the other side, a bright LED torch can emit a surprising amount of light, proving handy if you ever take the device away camping. Once drained, the portable power station can take between four and five hours to charge back up to full. Stick it on charge overnight and it will be ready to go again come morning.

How much does a smart plug cost?

A smart plug on standby should use less power than the devices attached to them - 20 hours per day on standby will cost you 97p. This is less than everything bar a TV and Blu-ray player, based on our tests. However, there's a catch. The cheapest smart plug we've tested is £8.99, but some can cost over £40.

Can a portable power station charge a laptop outside?

Another customer added: "What I'm not impressed with is the output levels on the USB ports; a type C cable port isn't delivering fast charging because the fast charge symbol does not show on my device when I use it - the type C port outputs around 10 watts." The portable power station can keep a laptop charged outside. (Image: Amazon)
