How do I get 220V from a 110 volt inverter?

You would have to get a step-up transformer (perhaps auto-wound for lower costs) to get 220 from a 110 inverter. Re: 220v from two inverters? Aloha, Can I parallel two of the same MSW inverters @110v each and get 220v single phase? If so, then would I tie the two neutrals together? Reference my system below. thanks

Can a 240 volt inverter be used with two 240V inverters?

You could use two inverters and tie their neutrals together. Most of better ones won't care about this. The trick is if you have any 240vac loads they could have any voltage from 0 to 240v as the two inverters won't likely be in sync or stay in sync with one another, even matching ones. I would go the T240 /transformer route.
