

How much is the wholesale price of photovoltaic folding container house in Venezuela

How do foldable photovoltaic panels work?

The foldable photovoltaic panels are tucked inside a container frame with corresponding dimensions, and once they are moved and set in place, they can be easily unfolded using the rail system that also unrolls from the container.

What is a mobile solar container?

The Austrian energy company SolarCont has developed a mobile solar container that stores foldable photovoltaic panels for portable green energy anywhere.

How much energy does a mobile solar Container Supply?

As of publishing this story, SolarCont mentions that the mobile solar container and its foldable photovoltaic panels can supply around 32 households with its green energy. This estimation is based on the team's assessment of the average power consumption of a four-person household of 4,000 kWh per year and a location in Southern Germany.

What is a mobile photovoltaic system?

That is why we have developed a mobile photovoltaic system with the aim of achieving maximum use of solar energy while at the same time being compact in design, easy to transport and quick to set up. This system is realized through the unique combination of innovative and advanced container technology.

How many solar panels can be installed in a solar container?

The unfolded panels can reach up to 120 meters in length, and there are 240 solar panels that can be installed. The Solarcontainer is a mobile system that can be used for both on- and off-grid purposes, including rescue missions and gatherings. The foldable photovoltaic panels are tucked inside a mobile solar container.

How many households can a solar Container Supply?

Based on an average power consumption of a 4-person household of 4000 kWh per year and a location in Southern Germany, the solar container can supply approx. 32 households with climate-friendly electricity. At a location in Southern Europe it can even be up to 50 households due to the high solar radiation.
