On-Grid Solar Kits - Grid connected DIY systems. On-grid string inverter solar kits are a type of solar power system that connects to the utility grid and uses a string inverter to convert the direct current (DC) output of the solar panels into alternating current (AC) electricity that can be used by your home appliances or fed back to the grid.

Micro-inverters enable single panel monitoring and data collection. They keep power production at a maximum, even with shading. Unlike string inverters, a poorly performing panel will not impact the energy production of other panels. Micro-inverters have more extended warranties--generally 25-years. Cons--
