Why Buy a 48-volt Inverter? What is a 48 Volt inverter? It is a device that converts 48V Direct Current to 120V (110v) Alternating current. In other words, it is a device that can take current from a bank of batteries (48V) and convert it to the type supplied in the grid to power your appliances and devices.. I suggest you use A 24-volt inverter or 36-volt inverter or 48-volt inverter when ...
