DC Compressor; DC Motor - Ensures reliable operation with much higher energy saving and lower operation sound. UVC Sterilization; Wide Voltage Operation - Enables inverter air conditioner to start working from 150V-264V. 52°C Stable ...

Solar inverters are essential components of solar energy systems, converting the direct current (DC) electricity generated by solar panels into alternating current (AC) electricity suitable for use in homes, businesses, and the electrical grid.

Without the inverter, the power generated by the solar system is kind of useless. In simple words, the whole process is when solar panels capture sunlight and converts it into energy, which is sent to the inverter, which turns the DC energy into AC energy. After the energy conversion, solar electricity can power all the appliances and electronics.
