

Korea container refrigerator generator

What is a genset on a reefer container?

The Genset, also known as a Clip On Generator, is a handy unit that clips onto the chassis of a Reefer Container to provide power when an external source of power is not available, such as during transport. Our Gensets run on diesel, gasoline or gas. Disc type radial fan for cooling: Sealed large diameter rear bearing.

What is a Thermo King generator set?

Thermo King's generator set (genset) range provides the vital, independent power supply needed to maintain the cold chain in global container refrigeration. They provide dependable power after your marine containers are unloaded and unplugged from the ship, ready to continue their journey on the road or waiting for further transport on shore.

What is a container genset?

Container gensets mitigate this risk by providing a consistent power supply, even in remote or challenging locations. For example, frozen shipping containers rely heavily on these gensets to maintain ultra-low temperatures during transit.

Why should you choose a container genset?

Portability: Container gensets can be easily attached and removed, allowing for seamless integration into various transport modes. **Reliability:** Designed for continuous operation, they ensure an uninterrupted power supply for reefers.

Reefer Container Singapore. A reefer container, also known as a cold storage container or refrigerated container, comes in 10ft, 20ft and 40ft sizes. It is a well-insulated ISO shipping container that is used to move climate-sensitive goods.
