

Hoymiles has announced the completion of Latvia's first major energy storage facility, in which it has played a pivotal role. The T?rgale wind park, managed by Utilitas, the country's largest wind energy producer, combines wind energy generation with advanced storage capabilities, setting a new standard for its renewable energy infrastructure.

Dutch solar project developer and asset owner Photon Energy Group said in its Q4 2024 financial results that it lost EUR1.5 million (US\$1.57 million) on the sale of two operating solar PV power ...

T?rgale, Latvia -- On November 1, 2024, T?rgale Wind Park held its grand opening, unveiling Latvia's first major energy storage facility. Hoymiles, as a key technology supplier, played a ...

Hoymiles, as a key technology supplier, played a pivotal role in the project. Managed by Utilitas, Latvia's largest wind energy producer, this project combines wind energy ...

Nordic Investment Bank (NIB), Luminor Bank and Nord/LB have agreed to co-finance a 148MW solar farm in Latvia, which will be one of the largest in the country when built. The banks' overall financing for the project, in Ventspils, amounts to & ... Luminor Bank in financing European Energy's solar farm in Ventspils, Latvia - the largest ever ...

Latvia solar energy storage. T?rgale, Latvia -- On November 1, 2024, T?rgale Wind Park held its grand opening, unveiling Latvia's first major energy storage facility. Hoymiles, as a key technology supplier, played a pivotal role in the project. Managed by Utilitas, Latvia's largest wind energy producer, this project co

PRESS RELEASE 11 SEPTEMBER 2024 Niam Infrastructure and Evecon have formed a partnership for the

Latvian solar energy storage project

construction of up to 84 MWp of solar power and 26 MW of energy storage across 11 project sites in Latvia. This collaboration represents a substantial investment in the region's renewable energy sector, highlighting the strong growth potential of the

In Latvia, developer Utilitas Wind announced the official opening of a 10MW/20MWh battery energy storage system (BESS) last week (1 November) in Targale, a village in Latvia's north-eastern Ventspils region. The project is ...

Niam Infrastructure and Evecon have formed a partnership for the construction of up to 84 MWp of solar power and 26 MW of energy storage across 11 project sites in Latvia. This collaboration represents a substantial investment in the region's renewable energy sector, highlighting the strong growth potential of the Latvian market.

Germany-based Rolls-Royce has been awarded a contract to supply two large-scale battery energy storage systems to Augstsprieguma tīkls (AST), Latvia's transmission system operator, with a ...

Development to date Latvia's energy system is largely based on renewable resources, primarily hydropower from the Daugava River, supplemented by wind, solar, and biomass. While natural gas imports cover energy shortages, the country aims to increase wind and solar energy capacity, with significant progress already made in 2022. Country is ...

Latvia is on the precipice of becoming a green energy powerhouse. With political will being bent to ease the way for renewable energy investments, and while it correlates with social and politically-backed movements to integrate smart ...

Renewables developer European Energy will build a 115MW solar PV project in Latvia, which it says will be one of the largest projects in the country.

Evecon will also build 26MW of battery energy storage systems (BESS) at the project sites, but did not specify the timeframe for the construction and commissioning of these facilities.

A solar PV plant in Latvia that Latvenergo deployed via subsidiary Elektrum. Image: Latvenergo. ... The Energy Storage Summit Central Eastern Europe is set to return in September 2025 for its third edition, focusing on regional markets and the unique opportunities they present. ... KNESS has secured a EUR9.6 million (US\$10.35 million) loan from ...

Niam Infrastructure and Evecon have formed a partnership for the construction of up to 84 MWp of solar power and 26 MW of energy storage across 11 project sites in Latvia. ...

Niam Infrastructure has partnered with Evecon to construct and operate up to 84 MWp of solar power and 26 MW of energy storage across 11 project sites in Latvia. The partnership aims to invest significantly in the

Latvian solar energy storage project

region's renewable energy sector, highlighting the strong growth potential of the Latvian market.

Subscribe to Newsletter Energy-Storage.news meets the Long Duration Energy Storage Council Editor Andy Colthorpe speaks with Long Duration Energy Storage Council director of markets and technology Gabriel ...

Ignitis Renewables, an international green energy company, entered into an agreement to acquire 100% of the shares in Nord Wind Park, a renewable energy project under development in Pasvalys district, Lithuania. The hybrid power plant consists of a 200-megawatt (MW) wind farm, a 50 MW solar farm and a 20 MW (80 MWh) battery energy storage system.

Latvia has taken a significant step towards a greener future with the commissioning of its first utility-scale battery energy storage system (BESS). The 10MW/20MWh BESS, ...

Niam, Evecon launch 110 MW Latvian solar storage initiative A 84 MW of solar and 26 MW of energy storage portfolio will be installed in Latvia under the Niam-Evecon partnership. Discover the full project details here.

The most common renewable energy sources in Latvia are biomass and hydropower. Opportunities to develop wind power and solar energy segments are still open. To achieve the target, set for Latvia in EU RES (Renewable Energy Sources) Directive, it is necessary to use the existing potential and evaluate the additional possibilities offered
