

Does EDP produce electricity in Portugal?

The EDP Group develops electricity production activities in Portugal through two of its subsidiary companies: EDP Renováveis, with wind and solar generation, and EDP Produção, with hydro, thermal and floating solar energy generation. With the closure of the Sines plant in January 2021, EDP Produção no longer has coal in its energy mix.

Will Northvolt build a lithium conversion plant in Portugal?

With electric vehicle (EV) sales surging across Europe, Swedish battery manufacturer Northvolt announced April 13 its intent, together with Lisbon-based multinational energy conglomerate Galp Energia, to construct a massive lithium conversion plant on Portugal's southern coast.

How is electricity produced in Portugal?

Electricity production in Portugal is classified in 2 ways: production under the ordinary regime (PRO) and under the special regime (PRE). The ordinary electricity generation regime applies to the production of electricity based on traditional non-renewable sources and large hydroelectric centers.

How many tons of lithium are there in Spain & Portugal?

The companies believe the area, home to 300,000 and 270,000 tons of respective lithium reserves in Spain and Portugal, offers the necessary tools to extract, concentrate, and convert the mineral with a limited footprint.
