What is a UPS Power Supply? A uninterruptible power supply or uninterruptible power source (UPS) is an electrical apparatus that provides you with emergency power to a load when the input power source or mains power fails in cases of power outages or load shedding. A UPS differs from an emergency power system or standby generator as it provides near-instantaneous ...

Online uninterruptible power supplies use a combination of rectifier and inverter to supply power to the AC load in normal operation. During a power failure, power is supplied with the support of an inverter. Conversely, an offline system supplies power from the AC mains to the load. An online system's output power supply stays on.
