

Malaysia Penang Solar Fan Manufacturer

How does a solar roof ventilation fan work?

Verdant Star solar ventilators fan use free solar energy to cool your house and protect your house from damage caused by moisture in the air. Solar Roof Ventilation Fan continuously exchanges air in attic to avoid heat from building up. During the day, the hot sun will radiate on your roof and accumulate heat in the attic.

What is verdant star solar fan?

The Verdant Star solar fan is the perfect solution for cool sunny days! Verdant Star Solar Ventilation System supplier in Klang Valley provide best promotion price. Best Solar Roof Ventilator Fan supply, install and service

What services & products are offered by a solar company?

Our services and products include solar water heating systems, solar hot water heaters, roof vents, roof ventilation fans, and systems as well as solar roof ventilators. We take pride in our products and ensure that they are produced with finest materials to ensure that our customers always get the best value for their money.

Why do you need a solar roof ventilator fan?

All the hot attic air will be exhausted by the Solar Roof Ventilator Fan consistently. Help to maintain optimal temperature and air circulation. With the high speed of rotating ventilator fans, it will create a negative pressure zone at your attic.

How long does a verdant Star Solar ventilation fan last?

The Verdant Star Solar Ventilation Fan comes with 5 years product warranty and the average lifespan of the product is more than 10 years. What is the difference between a Turbine Fan and a Verdant Star Solar Ventilation fan? The Verdant Star Solar Ventilation Fan is 8-10 times more effective compared to Turbine Fan.

Why should you use solar energy for your exhaust fan?

With the exhaust fan solar energy, indoor temperature will be reduced significantly and the air becomes cool, ventilated and certainly more than the cost of electricity will decrease greatly because then system Air will be offloading. That's because our products utilize endless source of energy from the sun.
