

Managua drop shipping energy storage battery overseas warehouse

Can you ship a battery within a country?

While there are regulations for cross-border shipping of batteries, you can generally ship batteries within a country. Many electronic products and devices contain batteries, especially lithium batteries found in laptops, smartphones, tablets, medical devices, and power tools.

Can I ship a lithium battery internationally?

Lithium batteries are classified as Dangerous Goods and not all types are accepted by DHL Express. There are regulations attached to the cross-border shipping of batteries, including lithium batteries, to ensure they travel safely. These regulations vary depending on the type of batteries.

How do I safely ship a battery?

When preparing batteries for shipping, it's crucial to follow several key safety practices. First, examine the Watt-hours rating, which indicates the battery energy capacity. Higher Watt-hour batteries require greater precautions. Also, check the State of Charge (SOC), which is the percentage of available power.

Are lithium-ion batteries a dangerous cargo?

BESS with lithium-ion batteries is classed as a dangerous cargo, subject to the provisions of the IMDG Code. In the IMDG Code, there are multiple descriptions and shipping names for lithium cells and batteries, depending on their chemistry and whether they are stand-alone, within equipment, contained within vehicles or cargo transport units.

What guides carriers on handling damaged batteries?

Emergency Response Information guides carriers on handling the batteries in case of damage, leak, fire, etc. Required for all battery types.

What is UN 3536 (lithium batteries installed in cargo transport unit)?

UN 3536 (Lithium batteries installed in cargo transport unit). Carriers should also be aware of the applicability of the different special provisions (SP) of the IMDG Code. SP 389 (which mentions the securing of batteries to the interior structure of the cargo transport unit) is applicable only to UN 3536.
