Will India's first battery energy storage system be regulated in 2024?

New Delhi | 08 May 2024 -- In a significant step forward for India's energy transition, the Delhi Electricity Regulatory Commission (DERC) has granted regulatory approval of India's first commercial standalone Battery Energy Storage System (BESS) project.

What is India's first battery energy storage system?

IndiGrid launches India's first utility-scale Battery Energy Storage System in Delhi, enhancing renewable energy integration.

Why is battery energy storage important in India?

Battery energy storage is a key enabler of a resilient and efficient power system in India as the country moves toward a cleaner energy mix. The ability to store and dispatch power intelligently will be essential in maintaining grid stability and optimizing renewable integration.

India is set to launch its first commercial utility-scale Battery Energy Storage System (BESS) in Delhi, expected to go live by March this year. With a capacity of 20 MW (megawatt) ... Nowruz 2025 Persian New Year Festival Previous Post Previous post: Border Security Force (BSF), History, ...
