

New inverter generator price

Are Inverter generators worth it?

Hurry, this deal won't last long! Portable generators are crucial during power outages and helpful for remote locations, and inverter generators are the crème de la crème in terms of efficiency.

What is an inverter generator?

Inverter generators are the smaller, cleaner, and quieter siblings of traditional portable generators. If you're looking to go camping, tailgating, or backup sensitive electronic devices around the house, then you should consider an inverter generator.

What is the best inverter generator?

The Honda EU7000 is the best inverter generator thanks to its stellar versatility, efficiency, and low-noise performance. Providing 7,000 starting watts, you can use it for anything from camping to RVs, to even basic home backup during an emergency. No matter what you use it for, you'll barely hear its 52-60 decibels of volume.

Do Inverter generators have a power potential?

With inverter generators, the proof is in the power. We consider each generator's power potential for a given use, which involves looking at both surge and running wattage. Surge wattage is the extra, temporary wattage a generator can produce to start electric motors. Running wattage is how much wattage the generator can produce long term.

Can a portable inverter generator be used as a home generator?

As such, using one of these units as a home generator may be easier. Some users may struggle with the weight of larger, more powerful units. Thus, some portable inverter generators have wheels and handles for easier transport to desired locations.

How do inverters work?

Unlike traditional portable generators, inverters use a built-in computer to stabilize the power produced by the generator. We call this "cleaning up" the power because it prevents the surges in voltage and frequency variations common in traditional generators.

Honda Power Equipment sets a new standard in portable power with the introduction of an all-new EU2200i inverter generator with Co-Minder. The EU2200i delivers 10 percent more power than ...
