By revealing accessible routes to implementation, energy efficiency in buildings provides the opportunity to support Nigeria to gain traction in the adoption of measures and opportunities available in country. ... care should be taken in design to avoid excessive

window-to-wall ...

However, a shortcoming of the current PV curtain wall with common double-glazed PV modules lies in the poor thermal insulation performance due to the high solar heat gain coefficient (SHGC) and U-Value [11]. BIPV modules can still have a thermal conductivity of 1.1 W/m K, even when inert gas filled up the gap within a double-glazing unit [12].

This paper mainly elaborates on the following work: (1) The novel PV curtain wall system combined with supply air reheating was proposed, and its working principle was described. (2) The dynamic mathematical model of the system was established based on energy balance principle and validated using the experimental results. (3) Taking an office ...
