What are double glass solar panels?

Double glass solar panels, also known as glass-glass or glass solar panels, are made up of two layers of tempered glass that cover both sides of the solar panel. The glass replaces the traditional aluminum frames and backsheet substrate. The two layers of glass are bonded together with a special encapsulant.

How are polycrystalline solar panels made?

Polycrystalline solar panels, also known as multi-crystalline or many-crystal silicon panels, are made from silicon. Polycrystalline panels are made by melting multiple silicon fragments together to form wafers. The melted silicon is left to cool on the panel itself. The wafers are then sliced into thin cubes.
