In order to run inside a tent, an air conditioner has to be powerful enough (at least 5000 BTU for small size tents), has to be able to run constantly to keep up with the cooling demand and it does require some improvements to the tent (extra insulation, airtightness) to help keep the tent cool.

Solar-Powered Air Conditioner Pros and Cons. Only by weighing the pros and cons can you decide if investing in a solar-powered AC unit makes sense for you. Consider things like protection from grid outages and money saved on monthly electric bills against the cons of the limitations of sunlight and initial costs.
