

Portable static electricity removal power source manufacturer

How do exair industrial static eliminators work?

EXAIR industrial Static Eliminators combine our engineered airflow products with ionizers which give our products the ability to eliminate static charges quickly and from long distances. Prevent dust from clinging to products, materials jamming or tearing, sheet feeding woes, and hazardous shocks by neutralizing static with our eliminators.

What is a SJ-M micro static eliminator?

The high-performance SJ-M Series micro static eliminators are used as ultra-small embedded static eliminators. Spot nozzles and wide-area electrode probes are available depending on the required range of static elimination. Spot nozzles can focus on ionization and be built into a system designed to withstand high temperatures up to 80°.

What is a static elimination process?

In a static elimination process, an ionizer or a static eliminator is used to neutralize static charge by generating positive and negative ions that offset the existing imbalance of ions. Static elimination by means of an ionizer can remove local static charge as well as reduce static buildup in the entire room, while simultaneously removing dust.

What is the MEJ Static Control Bar used for?

The MEJ Static Control Bar is a very efficient and versatile static eliminator which is used in a wide variety of applications. It is used for spot static control and for applications with hard to reach static charges.

How do you prevent static electricity?

When considering methods to prevent, reduce, or remove static electricity, there is grounding, insulation to prevent static buildup, temperature control, anti-static gear and tools, and static elimination.

Who is Shanghai Anping static technology?

Founded in 1999, Shanghai Anping Static Technology Co., LTD., is a high-tech enterprise integrating R&D, production, sales and technical services. Professional static analysis, intelligent monitoring and elimination solutions provider.

Suntree Low Voltage 220V DC SPD Power Strip Surge Protective Device with TUV CE \$7.00 - \$30.00. ... China suppliers anti electrostatic ion fan dust remover static electricity remover \$129.00 - \$149.00. ... Alibaba makes it easy to source wholesale electrical tools, apparel and components, so that you can tackle any task. ...

Identify the source of your static problems and keep your static eliminators maintained with these helpful accessories. EXAIR's Static Meter locates and provides a value of static charge within your process so you

Portable static electricity removal power source manufacturer

can begin solving your static related problems; Replacement emitter points and power supplies available here

The product of the company's main research and development is: Electrostatic eliminator bar, corona treater, ion air bar, high voltage generator, ionizing air blower, static field meter, static sensor, Electrostatic electret equipment and ...

Simco-Ion offers a wide variety of Static Eliminators and industrial equipment for static neutralization. View all of our products online today. Phone: 215-822-6401 | Toll Free: 800-203-3419

The Best Portable Power Stations. Best Overall: Anker F3800 Plus Portable Power Station Best Value: Jackery Explorer 300 Plus Portable Power Station Best Mid-Size: Bluetti Elite 200 V2 Portable ...

Static eliminators work by generating ions (cations and anions) that neutralize static electricity through ion collision. They are effective on both conductors and insulators and can be installed ...

The present invention relates to a portable dust remover using static electricity, in which dust deposited on an outer surface of props or corners of a space effectively adheres to the remover. The dust remover includes a body having a metallic hollow head portion and a body portion engaged to the head portion at one end; a drive roller rotationally installed in the body portion; ...

Potential ignition source--Static electricity is generated by the separation of like or unlike bodies. For significant electrical charges to develop, the bodies must become and remain insulated with respect to each other. In the petroleum industry, the static charge results from contact and separation that takes place in a flowing liquid.

The SJ-F700 Series Multi-Sensor Ionizer offers complete automation of periodic maintenance - an essential task with any static eliminator. Both probe cleaning and maintenance are done automatically by the unit, which eliminates the ...

Air Source DC Ion Bar Built-in type of high voltage power supply equipped with HDC-AC HDC-AC technology is adopted to realize long-term stability of static electricity removal performance and long-term no cleaning The time and size of static electricity removal

Ionizing Air Gun 10KV Antistatic Air Gun for Industrial Use. With double ion needles and a powerful 10KV output, this industrial-grade antistatic air gun is ideal for professionals who need precise static elimination in manufacturing environments. The upgraded 70W H-V generator delivers twice the effectiveness of 4.6KV models, making it perfect for point-to-point static control.

Koganei Asia offers a range of static electricity removal solutions, including fan, blow, bar, and air gun types, designed to efficiently eliminate static charges. Our products, such as the DTY ...

Portable static electricity removal power source manufacturer

High-performance digital-controlled welding power source. Suitable for medium-to-thick plates welding with various welding modes. ... The e-GPU provides the electrical power required by the aircraft during maintenance and flight ...

Ionization fans allow highly efficient neutralization of static electricity over long distances and large areas. Power supplies. Ionization bars and pins need to be fitted with power supplies of high voltage. Such sources have various number of connectors of ionization bars (1, 2, 4) with different length capacity.

With our huge experience and knowledge in this domain, we are offering an excellent range of Contact Type Anti static Web Cleaning System to our esteemed clients. These high performing web cleaning systems offered by us manufactured with integrated anti static controls for continuous webs of plastic or paper, delivering increased quality and productivity.

QP-ES safe and efficient static eliminator is a static eliminator with low power consumption, high energy, fast static eliminator speed and simple installation, which is suitable for eliminating static electricity in a variety of ...

Static generation is proportional to the speed of the material. Faster speeds create higher charges. The speed of the material also determines whether more than one static eliminator bar is required. Some years ago, the ...

Hangzhou innovation technology co.ltd is best static charging, static eliminator and static measurement supplier, we has good quality products & service from China.

EXAIR are suppliers of industrial ionizers used to eliminate static electricity quickly. Prevent static from attracting dust, creating material jams, hazardous shocks. Order Now!

SMC eliminates a variety of static Front matter 1 Measurement Equipment (Handheld) Confirming electrostatic charge and removal of static electricity Electrostatic Removal Equipment Removing static electricity by ionizer PreventsPrevents adhesion of foreignadhesion of foreign materials such as dust.materials such as dust.

Potential removal is an important issue for industry: it will carry out the necessary measurements and take measures to neutralize the danger. We have our own mobile laboratory containing all the necessary instruments for measuring the danger of static electricity. After completion of the work, LABSIZ will generate a technical report suitable ...

Remove static electricity from an area as large as 600 × 1500 mm using just a compact head. Eliminate static from more than 1 m away in under 1 second. Use branching to remove static ...

Portable static electricity removal power source manufacturer

Ionization fans allow highly efficient neutralization of static electricity over long distances and large areas. Power supplies. Ionization bars and pins need to be fitted with power supplies of high voltage. Such sources have various number ...

fire, electric shock and static electricity removal trouble. REMEMBER If noticing anything strange, stop using the F120R-E immediately. PROHIBITED Do not use the F120R-E for other purpose than static electricity removal. PROHIBITED Do not remodel or disassemble the F120R-E. The F120R-E contains high voltage parts.

With the right solutions and equipment, manufacturers can control and limit the build-up of static electricity:. Ionisation: Ionisers release positive and negative ions into the air, which then attach to any static charges on a surface, neutralising them. Humidity control: Moisture in the air helps disperse static electricity, as water molecules allow charges to move more easily.
