Which AC voltage stabilizer is best for home use?

ATO single phase automatic AC voltage stabilizers with a capacity rating from 500VA to 50kVA, 140V to 260V input voltage range, high performance and compact size, are ideal for the home purpose.

What is a voltage stabilizer?

Voltage stabilizers are electronic devices responsible for correcting the AC voltage of the electrical power supply to provide a stable and secure power supply to equipments, allowing for a stable voltage and protecting the equipment from most of the problems of the mains.

How does a stabilizer work?

A: The stabilizer will give a stabilized and safe voltage to the connected equipment within the specified limit even if the input voltage is high or low. It does so by using an auto transformer having a number of tapings, which will be selected as primary/secondary for step up/step down operations in accordance with the input voltage level.

Can a TV stabilizer be used with a refrigerator?

A: No, because the working range requirement for refrigerators and TV are different. Refrigerators require stabilizers with low voltage cut-off and time delay other than the high voltage cut off. However, the TV stabilizers are only equipped with a high voltage cut-off.

What protections does an inverter have?

ADVANCE PROTECTION - This inverter has all the protections that you will need. Overload, over voltage, under voltage, high temperature and short circuit. All of these protections are displayed on the LCD screen, as well as input voltage, output wattage and battery level.

What is AtO 3 phase AC voltage stabilizer?

ATO 3 phase automatic AC voltage stabilizers with capacity rating from 8kVA to 300kVA, 175V-265V (phase voltage)/304V-456V (line voltage) AC input voltage range, 380V output. They are air cooled full-automatic compensated voltage stabilizers designed for various industrial applications.
