Fueled by the creative spirit and expertise of our world-class research and development team, we are at the forefront of the Photovoltaic (PV) and inverter industry, driving innovative ...

Energy storage inverter price per watt At the average \$0.18 per watt and with the average installation costing \$2.93 per watt, inverters usually account for about 6% of total installation costs. This means that a typical 5.6-kilowatt installation costs \$16,408 in total and the inverter should account for about \$1,000 of that.

This will give you a benchmark to compare your own inverter cost to. So, for example, an inverter for a 10 kW installation should cost around \$1,800. For a 17 kW installation, the inverter should cost around \$3,060. Keep in mind this is an average cost. American-made inverters, micro-inverters, and high-efficiency inverters all come at a ...
